

Instructions for Downloading Trial Version of Fiber Works

Go the Fiberworks website at <http://www.fiberworks-pcw.com/download.htm> and click on to Download Bronze 4.2 Setup. It will walk you through the setup process. I just did it and it was easy. I got the Bronze version, so I can work along with you in the workshop with an unvalidated version.

If you purchased the program, the next step would be to obtain the validation code, Without the code you will be able to create files, but you will not be able to save the files or print the files. I will be teaching you the basics of entering a threading draft, tie-up, and treadling draft to create a drawdown of your pattern. You will get to see how the software can be part of the design process.
